

SAKSHI PAWAR

Arlington, TX | (817)-822-8775 | sakshipawar2604@gmail.com | linkedin.com/in/sakshi--pawar

EDUCATION

M.S. in Computer Science, University of Texas at Arlington, USA	May '26 GPA: 3.8
Bachelor's in Information Technology, University of Pune, India	May '23 GPA: 3.9

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, SQL, Python, HTML, CSS, Golang.
- **Libraries:** React.js, Next.js, Node.js, Angular, Express, Spring Boot, NumPy, Pandas, TensorFlow, PyTorch, Scikit-learn Services.
- **Software & Tools:** Git, Microsoft Excel, Visual Studio, Siemens Teamcenter, RestAPIs, Jira, Jenkins, Linux, PowerBI, Tableau.
- **Cloud:** Amazon Web Services (EC2, Lambda, Redshift, RDS, S3), GCP, Microsoft Azure, Docker, Kubernetes, Terraform.

EXPERIENCE

Software Engineer, Accenture Aug '23 – Jul '24

Product Lifecycle Management Interface Development for Engineering Teams.

- Engineered a React–Typescript interface with Redux and REST APIs for engineers, reducing the Teamcenter approval cycle by 30%.
- Developed a Node.js and Express access portal for 500+ PLM users with DynamoDB and JWT, cutting configuration errors by 40%.
- Optimized PLM document-storage backend using AWS Lambda, S3 policies, and Docker, improving API response time by 45%.

Software Engineering Intern, SysTools Jul '22 – Jun '23

Email Migration and Cloud Storage Solution for Enterprise Clients.

- Built a migration tool in Angular and Spring Boot for enterprises, automating PST-to-MBOX for 10,000+ emails per batch.
- Configured AWS S3 storage interface for remote teams with role-based access and signed URLs, reducing storage costs by 80%.
- Enhanced email search for litigation using Elasticsearch sharding and caching, achieving 40% faster retrieval for 100,000+ records.

Full Stack Developer Intern, IEEE Pune Section Jun '21 - May '22

Cultural Event Membership Management Platform using MERN Stack.

- Designed a membership platform with Node.js, Express, and MongoDB for event organizers, enabling signup for 2,000+ attendees.
- Developed a React-Redux dashboard using GraphQL for member tracking and analytics, increasing repeat participation by 75%.
- Automated Python reporting scripts for admin analytics dashboards and reports, reducing manual data processing time by 50%.

PROJECTS

Emotion-Based Sentiment Analyzer, University of Texas at Arlington Jan' 25 - May' 25

- Implemented sentiment analyzer with React and Flask for customer reviews, achieving 66% emotion and 84% sentiment accuracy.
- Configured RESTful APIs with caching and async processing for model inference, reducing latency to below 200 ms for predictions.
- Orchestrated Docker deployment on AWS EC2 with a CI/CD pipeline, ensuring sub-second responses for concurrent users.

Pharmacy Management System, University of Texas at Arlington Aug '24 - Dec '24

- Introduced a pharmacy app with Angular, Spring Boot for clinics, automating prescription and billing, reducing data entry by 60%.
- Leveraged JWT authentication and role-based access with MySQL, enabling medication tracking for pharmacy staff.
- Architected a modular backend with Spring Boot services for billing and inventory, supporting independent feature deployment.

RESEARCH & ACTIVITIES

- Object Detection and Recognition System Using Deep Learning Method (<https://ieeexplore.ieee.org/document/10126316>)
- Criminal Recognition System (<https://ieeexplore.ieee.org/abstract/document/10497321>)
- Face mask detection using the Viola-Jones algorithm and ssdmnv2 model | Copyright no. L – 105116/2021 | Govt. of India
- Secured 3rd place in La Trobe Innovation Challenge (2022) for designing a blockchain + IoT sustainability platform
- Coordinated 15+ tech events and designed 10+ newsletters as IEEE Coordinator, boosting engagement among 300+ members
